

JangoMail for Salesforce Data Sheet

JangoMail for Salesforce is a **powerful email marketing application** that integrates right into your Salesforce account. Easily send targeted email campaigns to your Contacts, Leads, and Campaigns in Salesforce. JangoMail's integration with Salesforce is **especially unique because we provide custom buttons that let you send email campaigns right from within your Contacts, Leads, and Campaigns tabs**. For example, go to your Contacts tab, view a list of your contacts, check the box next to the Contacts to whom you wish to send an email campaign, and then click the "Send JangoMail Email to Selected Contacts" button. Additionally, when you view any particular Contact or Lead, you can also view that person's complete JangoMail email history, including email campaigns received, and any actions, like opens, clicks, unsubscribes, forwards, and bounces.

Additionally, take advantage of these powerful JangoMail features:

1. **Fanatical email deliverability** – see http://www.jangomail.com/features_deliverability.asp for more information on how we ensure your emails get to the Inbox.
2. **Real-time AJAX-based reporting** – see <http://www.jangomail.com/ViewNewsReporting2.asp> for more information on our unique Reporting module, including direct access to SMTP log files
3. **Email Rendering** – see what your email will look like in different email environments before you hit the Send button. See <http://www.jangomail.com/ViewNewsRender.asp> for more information.
4. **24x7 emergency support**, via <http://www.jangomail911.com>
5. Full **support for email authentication standards**, like DomainKeys, DKIM, SPF, and SenderID.
6. **Triggered emails** that can be sent upon a particular recipient action, like opening an email, clicking a particular link, or landing on a particular page on your web site.
7. A **powerful browser-based HTML editor** so you can design emails from scratch without having to know HTML
8. A **click-tracking visual overlay report**, that shows you graphically what areas of your HTML email campaign were clicked on most.
9. Integration with **Google Analytics**. See <http://www.jangomail.com/ViewNewsGoogleAnalytics.asp> for more information.
10. A powerful and distributed network of SMTP senders.

For a complete feature list, please see http://www.jangomail.com/features_overview.asp. Additionally, we're adding new features every week! See <http://www.jangomail.com/blog/> for the latest enhancements
